An engeneer has been on sight and provided detailed recommendations in his report. The outter brick wall is not structural and is just a decorative facade. All the brick in the effected area is to be removed nearly 16ft west of the crash point exposing the timber framing behind it. this is the actual structure of the building and it has been temporarily rebuilt and eclosed however this will now need to be re-done to include a preasure treated bottom plate sealed down to the concrete and new studs. This area of repair is about 8 ft wide. Sheets of plywood on the outside of this wall are not shot on correctly and will be redone as well totalling about 3 or 4 sheets. a single lolly collomn used inside a brick collomn to support the roofline 5 ft to the right of the crash spot will be replaced do to extensive rot on the bottom exterior steel portion of the lolly. once all this timber framing and lolly has been done an inspection will be required prior to	Public Building
