D. Time Frame for Completion:

1. Contract shall be complete in full by June 19, 2009

E. Materials:

1. All painting materials shall be by the Tnemec Company, Inc.; Valspar Co.; Dupont or of equal quality. The painting schedule has been prepared on the basis of Tnemec products and Tnemec recommendations for application. No brand other than those named will be considered for approval unless the brand and type of paint proposed for each item in the following schedule, together with sufficient data substantiated by certified tests conducted at no expense to the City, to demonstrate its equality to the paint(s) named is submitted to the City in writing for approval 30 days prior to signing the Contract.
2. The City shall have the option to submit results of certified tests to an independent Engineering firm of City's choice to evaluate data to determine if product is of equal quality. Additional types and number of tests performed shall be subject to the Engineer's approval. Evaluation shall be at no expense to the City.
3. All painting materials shall be delivered in unbroken packages, bearing the manufacturer's brand and name. They shall be used without alteration and mixed, thinned and applied in strict accordance with the manufacturer's direction for applicable materials and surface.
4. No paint containing lead will be allowed. Oil shall be pure boiled linseed oil.
5. Work area will be designated by the City for storage and mixing of all painting materials. Materials shall be in full compliance with the requirements of pertinent codes and fire regulations. Proper containers outside of the buildings shall be provided and used for painting wastes and no plumbing fixtures shall be used for this purpose.

F. Colors:

1. Colors shall be selected for each process by the City from a full range of colors available from the manufacturer.

G. Extra Paint:

1. Furnish one unopened gallon can of each type and each color of paint used.

H. Preparation of Surfaces:

1. All surfaces to be painted shall be prepared as specified herein and shall be dry, clean and strictly adhere to manufacturer's recommendations before painting.
2. All metal welds, blisters, etc. shall be ground and sanded smooth. All pits and dents shall be filled and all imperfections shall be corrected so as to provide a smooth surface for painting. All rust, loose scale, oil, tar, and asphalt bearing coatings, grease and dirt shall be removed by manufacturers approved solvents, wire brush, grinding or sanding.
3. All exposed carbon steel shall be full abrasive blast cleaning per SSPC SP #10 Near White Blast Cleaning. Abrasive blast cleaning surfaces shall exhibit a uniform, angular profile of 1.5-3.0 mils. Cleaned surfaces shall be primed within 8 hours of cleaning and prior to any surface rusting.
4. Concrete surfaces shall be free of all dust, oil, curing compounds, loose mortar and other foreign matter.
5. All concrete shall verify dryness by testing for moisture with via a Calcium Chloride Test (Reference ASTM F 1869). Abrasive blast or mechanically abrade concrete to remove existing coatings, laitance, form release agents, curing compounds, hardeners, sealers, and other contaminants and to provide a surface profile (Reference SSPC-SP13 / NACE 6, ICRI CSP 3-4).

I. Painting Schedule:

The following types of paints by Tnemec, Co. have been used as a basis for the paint schedule.

1. Exposed Carbon Steel:

- 1st Coat: Tnemec Series 1 Omnithane @ 2.5-3.5 mils DFT.
- 2nd Coat: Tnemec Series N69 Hi-Build Epoxoline II @ 6.0-8.0 mils DFT.
- 3rd Coat Tnemec Series N69 Hi-Build Epoxoline II @ 6.0-8.0 mils DFT.

2. Exposed Concrete:

- 1st Coat: Tnemec Series 218 Mortar Clad @ 125 mils DFT.

J. QA/QC:

1. After each application and prior to the next coat the Contractor shall inspect and verify that the mil thickness meets manufacturers requirements. Testing must be conducted by qualified personnel and by accepted industrial methods, standards and instrumentation. A written report must be submitted to the City and Engineer and verbal approval must be given prior to start of next coat. Testing shall be at no expense to the City.
2. Before final acceptance by the City a written summary of all activities performed must be submitted to include: dates of application(s) and product used, temperature(s) during application, weather conditions at time of application(s), mil thickness of each application, quantities used for each coat, applicators name, notes related to application or job, etc.

K. Workmanship:

A. General:

1. Mask all machinery nameplates and all machined parts not receiving a paint finish. Dripped or splattered paint shall be promptly removed. Lay drop cloths in all areas where preparation work and painting is being done to protect flooring and other work from all damage during the operation and until the finished job is accepted.
2. On metal surfaces apply each coat of paint at the rate specified by the manufacturer to achieve the minimum dry mil thickness required. If material has thickened or must be diluted for application by spray gun, the coating shall be built up to the same film thickness achieved with undiluted material. One gallon of paint as originally furnished by the manufacturer shall not cover a greater area when applied by spray gun than when applied unthinned by brush. Deficiencies in film thickness shall be corrected by the application of an additional coat(s).
3. On masonry, application rates will vary according to texture; however in no case shall the manufacturer's stated coverage rate be exceeded. On porous surfaces, it shall be the painter's responsibility to achieve a protective and decorative finish either by decreasing the coverage rate or by applying additional coats of paint.

B. Field Priming:

1. Steel members, metal castings, mechanical and electrical equipment to be painted shall receive one coat of primer before exposure to the weather, and this prime coat shall be the first coat as specified in the painting

schedule.

C. Field Painting:

1. All painting at the site shall be designated as Field Painting and shall be under the direct and complete control of the City and only skilled painters and specialists shall be used on the work.
2. All painting at the site shall be conducted during normal business hours (excluding holidays) – Monday through Friday, 7:00 AM to 3:00 PM.
3. The City of Rochester has developed and enforces a smoke free policy. The wastewater treatment facility site is considered a smoke free zone and smoking is only allowed in a designated area during break times. The contractor and its employees are expected and required to follow this policy while on site.
4. All paint shall be at room temperature before applying, and no painting shall be done when the temperature is below 60 degrees F, in dust-laden air, when rain or snow is falling, or until all traces of moisture have completely disappeared from the surface to be painted.
5. Successive coats of paint shall be tinted so as to make each coat easily distinguishable from each other with the final undercoat tinted to the approximated shade of the finish coat.
6. Finish coats shall not show brush marks or other irregularities. Undercoats shall be thoroughly and uniformly sanded with the type paper appropriate for the undercoats to remove defects and provide a smooth even surface.
7. Painting shall be continuous and shall be accomplished in an orderly manner so as to facilitate inspection.
8. All painting shall be performed by approved methods with number of coats modified as required to obtain the total dry film thickness specified. Spray painting shall be performed specifically by methods submitted and written approval by the manufacturer.
9. All surfaces to be painted as well as the atmosphere in which painting is to be done shall be kept warm and dry by heating and ventilation, if necessary, until each coat of paint has hardened. Any defective paint shall be scraped off and repainted in accordance with the City and manufacturer's direction.

10. Before final acceptance of the work, all damaged surfaces of paint shall be cleaned and repainted as directed by the City and in accordance with the manufacturer's recommendation.

D. Cleanup:

1. At all times keep the premises free from accumulation of waste material and rubbish caused by employees or work. At the completion of the painting, remove all tools, scaffolding, surplus materials and all rubbish from and about the buildings and site and leave the work area "broom cleaned" unless more exactly specified.
2. Upon completion, remove all paint where it has been spilled, splashed or splattered on all surfaces, including floors, fixtures, equipment, furniture, etc, leaving the work area ready for inspection.

I. INSTRUCTIONS TO BIDDERS
