

Bid 10-27

Questions & Answers

- 1) What is the total engineer's \$ estimate for this project? **\$1,300,000**

- 2) Does NHDOT Specification 108.01 Subletting of Contract, which requires the Contractor to “perform work amounting to not less than 50 percent of the total Contract bid amount”, apply to this project? **According to NHDOT, since we are referencing the standard NHDOT specification, we are required to adhere to the NHDOT specification 108.01 subletting of the contract which requires the prime contractor to perform not less than 50 percent of the total contract bid amount. With that said given the specialized nature of a significant part of the work (brick work, etc.) we will discuss with our design engineer whether that percentage should be lessened in the interest of the project. If we decide it is to be decreased, then we will issue a formal addendum that effect. We expect that a formal addendum will be issued later this week**
