

Question and Answers pertaining to Bid 11-17 and 11-18

Q.

Will the City be able to arrange a crane to off load unit from delivery truck? Due to the size it may come in 2 pieces. How close to the pad can we get with a crane? We need to know so these prices can be included in the bid. Is the used one indoors or out? Will the old unit need to be disconnected?

A.

City will unload at the site. If the generator comes in two pieces you would have to put it together once it is unloaded. You can drive right next to the pad. Generator is outdoors. Old unit will already be disconnected.
