I offer the following in support of Bid Number 11-20- Street, Walking Trail and Aquatic Weed Control:

- Municipal Pest Management Services (MPMS) has completed these activities in Rochester for over twenty years and is very familiar with the tasks to be completed.
- Michael Morrison, B. S. Entomology, is president of MPMS and is an expert on pesticides, especially in aquatic habitats.
- MPMS has superior insurance coverage not afforded by many other companies. This includes "purposeful and accidental" insurance and an "herbicide endorsement".
- MPMS has prepared a 2011 Right of Way weed control permit from the NH Division of Pesticide Control. MPMS has spent 8 hours preparing the GIS map now required by Pesticide Control. All the permit application needs is a signature.
- An Aquatic Permit is no longer necessary for work in WWTP plants in NH but the Aquatic Applicator licenses are still required.
- MPMS has New Hampshire Supervisory and Applicator licenses in aquatic and Right of Way weed control, as required for this permit.
- Roundup Pro Herbicide will be utilized for sidewalk weed control and along the walking trails.
- Rodeo herbicide will be utilized at the WWTP. Rodeo is an aquatic herbicide. MPMS has used Rodeo for over twenty years for local, state and federal agencies for aquatic plant control projects. Recent projects include the US Fish and Wildlife Service and Natural Resource and Conservation Service (NRCS), Maine DOT, The Nature Conservancy and NH Fish and Game Dept.
- MPMS is very experienced in street weed control applications and completes this service for eighteen municipalities in New England since 1985. MPMS has five utility vehicles equipped for sidewalk and off road access. No pickup trucks or applicators on foot are required. Applicators on foot are often alarming to the public.
- No subcontractors will be utilized.

Michael Morrison, President
Municipal Pest Management Services, Inc.
