Total new construction costs \$ 11,750,000 (estimated)
Current Base Assessment: \$226,600
Current 79-E Adjustment: - N/A
Full Value Assessment: N/A

Definitions:

Active – Substantial completion of project as determined by the Assessing Department. “Clock” has started on term as outlined in covenant.

Pending – Project has not started or reached substantial completion per Assessing Department.

Total New Construction Costs – Estimated cost of project.

Current Base Assessment – Assessed value prior to new construction. The “frozen” assessment to be used over the term of the 79-E with exception to market fluctuations.

Current 79-E Adjustment – Change in assessed value, which is a direct result of the new construction. This value is not included in the current base assessment and will be added to the property’s assessment once the 79-E covenant term expires.

Full Value Assessment – Current Base Assessment plus the Current 79-E Adjustment.

Substantial rehabilitation - Rehabilitation of a qualifying structure, which costs at least 15 percent of the pre-rehabilitation assessed valuation or at least \$75,000, whichever is less. In addition, in the case of historic structures, substantial rehabilitation means devoting a portion of the total cost, in the amount of at least 10 percent of the pre-rehabilitation assessed valuation or at least \$5,000, whichever is less, to energy efficiency in accordance with the U.S. Secretary of the Interior's Standards for Rehabilitation. Cities or towns may further limit "substantial rehabilitation" according to the procedure in RSA 79-E:3 as meaning rehabilitation which costs a percentage greater than 15 percent of pre-rehabilitation assessed valuation or an amount greater than \$75,000 based on local economic conditions, community character, and local planning and development goals.
