ZONING BOARD CLERK

	ZONING BOARD CLERK
Applicant: Darcy Murphy, Trustee Jolly Family Revocable Trust	
E-mail: damurphy@rivier.eduPh	none: 781-308-1616
Applicant Address: 354 Boston Road Chelmsford, MA 01824	
Property Owner (if different): Jolly Family Revocable Trust	
Property Owner Address: 283 Old Dover Road Rochester, NH 03867	
Variance Address: same	
Map Lot and Block No: Map No. 256 Lot 69	
Description of Property: 25acre residential/agricultural, with 1180 ft. of frontage	ge and over 900 ft. from road to back property line
Proposed use or existing use affected: Proposed use: detached ADU over 8	800 sqft. to be occupied by elderly homeowners
The undersigned hereby requests a variance to the terms of the Rochest	ter Zoning Ordinance, Ch. 275, Section 23.3
and asks that said terms be waived to permit <u>a detached accessible dwelling</u>	g unit over 800 sq ft.
The undersigned alleges that the following circumstances exist which presenting my case the testimony should be confined to the 5 criter	or a variance. I understand that while
Signed: Warry July Suphy	Date: 4/12/24

City of Rochester, New Hampshire

Zoning Board of Adjustment

Variance Criteria

1) Granting the variance would not be contrary to the public interest because:

Granting the variance is in the public interest because it enables elderly lifelong residents to age in place safely and with dignity. The proposed ADU will meet their specific needs, such as handicap accessibility, wider hallways, and space for in-home PT services, without impacting the public negatively. Given the special conditions of the property, including its size, setback, and lack of visibility from the road, there will be no adverse effects on the surrounding community or public interests.

2) If the variance were granted, the spirit of the ordinance would be observed because:

Granting the variance aligns with the spirit of the ordinance by promoting the welfare of residents, especially elderly individuals who wish to remain in their long-term home. The ordinance aims to ensure suitable living conditions while preventing overcrowding or nuisances for neighbors. In this case, the variance allows for a necessary accommodation without compromising the intent of the ordinance.

3) Granting the variance would do substantial justice because:

Granting the variance would achieve substantial justice by providing life-changing benefits to the applicants, allowing them to live out their remaining years safely and harmoniously. The ADU will not harm the public or neighboring properties; instead, it will support the well-being of elderly residents, which is in the interest of substantial justice.

4.) If the variance were granted, the values of the surrounding properties would not be diminished because:

Granting the variance will not diminish the values of surrounding properties since the proposed ADU will be situated on a large 25-acre lot with significant setback and no visibility from the road. The addition of the ADU will not introduce overcrowding or increase traffic since the same residents will occupy the property, maintaining the existing character of the area.

5.) Unnecessary Hardship:

- a. Owning to special *conditions of the property that distinguish it from other properties in the area*, denial of the variance would result in an unnecessary hardship because:
 - i. No fair and substantial relationship exists between the general public purposes of the ordinance provision and the specific application of that provision to the property because:

Denying the variance would impose unnecessary hardship on the elderly residents, forcing them out of their long-time home and into unfamiliar living arrangements, which would be detrimental to their well-being. The property's unique conditions, including its size and setback, make it impractical to conform strictly to the 800-square-foot limit while meeting the necessary accessibility and safety standards for the residents.

Enforcing the 800-square-foot limit without considering the specific needs of elderly residents on a large property with ample setback does not serve a fair and substantial public purpose. The ordinance's intent is to prevent overcrowding and maintain neighborhood harmony, which can be achieved without rigidly adhering to the square footage limit in this exceptional circumstance.

City of Rochester, New Hampshire

Zoning Board of Adjustment

And:

ii. The proposed use is a reasonable one because:

The proposed use of a slightly larger ADU to accommodate elderly residents with specific accessibility needs is entirely reasonable. It allows them to age in place safely, which is a reasonable expectation for long-term residents who have contributed to the community for decades. The ADU's placement and design ensure that it blends seamlessly with the property while addressing the residents' urgent needs without causing any negative impact on the neighborhood or public interests.

b. Explain how, if the criteria in subparagraph (A) are not established, an unnecessary hardship will be deemed to exist if, and only if, owning to the special conditions of the property that distinguish it from other properties in the area, the property cannot be reasonably used in the strict conformance with the ordinance, and a variance is therefore necessary to enable reasonable use of it.

Applicant: The Jolly Family Revocable Trust of 2022 (the "Applicant")

Property: Map No. 256, Lot 69

Relief: Variance from Rochester Zoning Ordinance 275-23 (Standards for Specific

Accessory Uses) Section A, 1, d.

Property History and Background

The property at issue is located at 283 Old Dover Road, Tax Map No. 256, Lot 69 (the "Property"). The Property consists of 25 acres and has 1180 feet of frontage. The Property has been owned and occupied by its current residents, Christine and Leander Jolly, aged 83 and 88, since 1968.

VARIANCE CRITERIA

1. Granting the Variance would not be contrary to the public interest because:

It is important to note that the test is in the <u>negative</u>. That is to say that it does not require the applicant to prove that the proposed use <u>is IN the public interest</u>, but only to prove that it is <u>NOT contrary to the public interest</u>.

Given the nature of a Variance, any Variance would be to some degree contrary to the public interest and the spirit of the ordinance. Perrault v. Town of New Hampton, 171 N.H. 183, 186 (2018). As such, a Variance must do more than conflict with the terms of the applicable zoning ordinance, Id., and, therefore, a Variance cannot be denied for the very reasons it is sought in the first instance. Malachy Glen Associates, Inc. v. Town of Chichester, 155 N.H. 102, 107 (2007). In order to be contrary to the public interest and violate the spirit of the ordinance, a Variance must unduly and to a marked degree conflict with the basic objectives of the applicable zoning ordinance. Perrault, 171 N.H. at 186 (emphasis added). To determine whether a Variance unduly conflicts with the basic objectives of the applicable zoning ordinance, a Board may consider whether the Variance will alter the essential character of the area or threaten the public health, safety or welfare. Id. (emphasis added).

Here, the Applicant is seeking relief to add a detached Accessory Dwelling Unit (ADU) greater than the 800 square feet.

By granting the Variance, there would be no harm to the public's interest and permitting the larger ADU will allow for full accessibility features. Granting the variance is in the public interest because it enables elderly lifelong residents to age in place safely and with dignity. The proposed ADU will meet their specific needs, such as handicap accessibility, wider hallways,

and space for in-home PT services, without impacting the public negatively. Given the special conditions of the property, including its size, setback, and lack of visibility from the road, there will be no adverse effects on the surrounding community or public interests.

2. The spirit of the ordinance is observed because:

As a matter of law, the analysis for both prongs one and two of the variance criteria are the same. <u>Harborside Associates</u>, <u>L.P. v. Parade Residence Hotel</u>, <u>LLC</u>, 162 N.H. 508, 514 (2011). For the same reasons that the grant of the variance is not contrary to the public interest, it also does not violate the spirit of the ordinance.

Furthermore, granting the variance aligns with the spirit of the ordinance by promoting the welfare of residents, especially elderly citizens, who wish to remain in their long-term home. The ordinance aims to ensure suitable living conditions while preventing overcrowding or nuisances for neighbors. In this case, the variance allows for a necessary accommodation without compromising the intent of the ordinance.

Substantial justice is done because:

The loss to the Applicant, in the event that a variance is denied, outweighs any gain to the general public. Accordingly, for reasons stated below, substantial justice would be done by granting the requested Variance.

Granting the variance for a larger ADU will ensure the safety and well-being of the lifelong elderly residents on the property. The additional space allows for wider hallways and doorways, essential for safe navigation using mobility aids like wheelchairs or walkers. Accessible bathrooms with features such as grab bars, roll-in showers, and wheelchair-accessible sinks become feasible, addressing the residents' daily living needs and promoting independence. Moreover, the larger footprint accommodates in-home health services like physical therapy, ensuring that the homeowners can receive necessary care within their living space. This emphasis on safety, accessibility, and tailored support for the elderly residents represents substantial justice, aligning with the community's values of compassion and inclusivity towards aging individuals who wish to age in place with dignity.

The public will experience no negative effects if this Variance is granted; and the public will gain <u>nothing</u> from a denial.

The values of surrounding properties will not be diminished because:

The proposed detached ADU will have minimal visibility from the road, further ensuring that the value of surrounding properties remains unaffected. Its strategic placement on the spacious 25-acre property, coupled with thoughtful landscaping and design considerations, will ensure that the ADU is essentially unseen from the road. The fact that the proposal has received support from neighbors and abutters indicates a general consensus that the ADU will not diminish property values.

5. <u>Literal enforcement of the provisions of the ordinance would result in an unnecessary hardship because</u>:

Denying the variance would impose unnecessary hardship on the elderly residents, forcing them out of their long-time home and into unfamiliar living arrangements, which can be detrimental to their well-being. The property's unique conditions, including its size and setback, make it impractical to conform strictly to the 800-square-foot limit while meeting the necessary accessibility and safety standards for the residents.

No fair and substantial relationship exists between the general public purposes of the ordinance provision and the specific application of that provision to the property because:

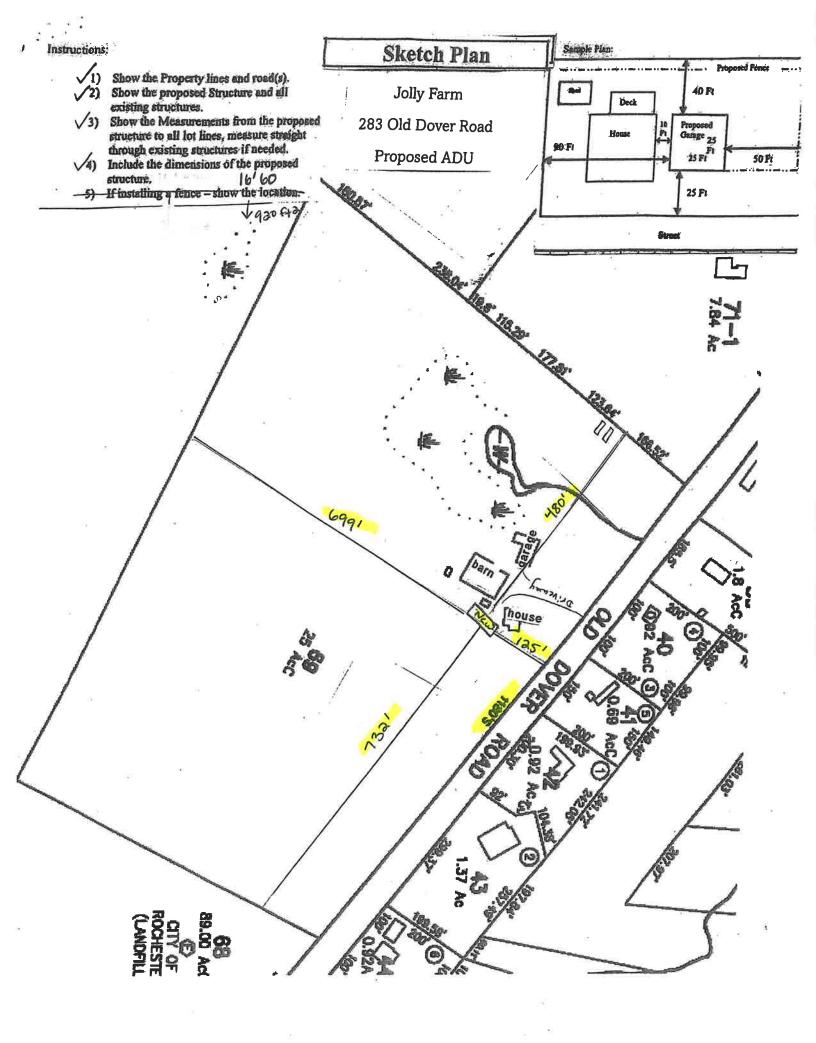

Enforcing the 800-square-foot limit without considering the specific needs of elderly residents on a large property with ample setback does not serve a fair and substantial public purpose. The ordinance's intent is to prevent overcrowding and maintain neighborhood harmony, which can be achieved without rigidly adhering to the square footage limit in this exceptional circumstance.

The proposed use is a reasonable one because:

** ** ***

The proposed use of a slightly larger ADU to accommodate elderly residents with specific accessibility needs is entirely reasonable. It allows them to age in place safely, which is a reasonable expectation for long-term residents who have contributed to the community for decades. The ADU's placement and design ensure that it blends seamlessly with the property while addressing the residents' urgent needs without causing any negative impact on the neighborhood or public interests.

Therefore, a denial would strip the Applicant from being able to make a reasonable use of their property and, consequently, deny the Applicant an opportunity to age safely in place.

Street view of property.

Proposed ADU will be behind

main house, unseen From the

road. Distance From house to back

property line, over 750 Ft.

275-23.2Standards for specific accessory uses.

- <u>A.</u> The following standards shall apply to these specific accessory uses, activities, structures, and situations wherever they are allowed:
- (1) Accessory apartment. An accessory apartment is permitted subject to compliance with all of the following standards and procedures: [Amended 4-4-2017]
- (a) It is permitted where and as specified in the Tables of Uses (by right or by special exception). However, if the accessory dwelling is detached from the single-family dwelling, it must be approved by a special exception;
- **(b)** It is accessory to a single-family dwelling only and if detached from the single-family dwelling it is similar in architectural style;
- (c) It must be two bedrooms or less;
- (d) It may not exceed 800 square feet;
- (e) It may be either part of the single-family dwelling or in a separate building, such as above a garage; if it is part of the single-family dwelling, an interior door shall be provided between the principal dwelling unit and the accessory dwelling unit; [Amended 3-5-2019]
- (f) There may be only one per lot;
- (g) The owner of the property must occupy one of the dwelling units and the owner must demonstrate that one of the dwelling units is his/her principal place of residence;
- (h) At least one parking space must be provided for the unit;
